ABOUT ME

Full Stack Developer with 3 years of experience building and scaling B2B and B2C travel platforms using React/Next.js, Node.js/Express, and MongoDB. Led front-end architecture and development for Flyzy (corporate dashboards), DirectOne (agent management), and TryVisa (visa automation), achieving measurable gains in performance, workflow automation, and payment integration. Currently pursuing an MBA in Business Analytics to deepen expertise in product strategy and data-driven decision-making.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, HTML, CSS, SQL
- Frameworks & Libraries:** React, Next.js, Node.js, Express.js, Material UI, Tailwind CSS
- Databases & Caching:** MongoDB, PostgreSQL, Redis, Firestore, Firebase Realtime Database
- Cloud & Services:** Firebase Hosting/Functions/Scheduler, Cloudflare R2/CDN, Razorpay, PhonePe, GitHub Actions
- Monitoring & Analytics:** Grafana, Prometheus, Loki, Google Analytics, OpenReplay
- Tools & Platforms:** Retool, n8n, Make.com, Postman, Docker, Git, Figma, VS Code, Cursor
- Project Management:** ClickUp, Jira

WORK EXPERIENCE

FLYZY – GURUGRAM, HARYANA, IN
SDE-2, Full Stack Developer | April 2025 – Present
SDE-1, Full Stack Developer | April 2023 – March 2025

Flyzy Corporate Dashboard (B2B Travel Platform)

- Primary Frontend Owner & Full Stack Contributor:** Spearheaded the frontend architecture (React/Next.js) with near-total ownership, while actively developing backend APIs (Node.js/Express) for a comprehensive B2B platform handling flights, hotels, and packages.
- Team Analytics & Policy Engine:** Engineered a hierarchical team management module featuring real-time booking analytics. Designed a dynamic travel policy engine allowing corporate admins to set automated booking limits, manage compliance, and process limit-increase requests via multi-level approval workflows.
- System Optimization:** Optimized MongoDB queries, migrated asset storage to Cloudflare R2, and integrated direct Razorpay checkout with idempotent payment handling, reducing transaction failures and accelerating load times.

DirectOne (B2B Travel Agent Portal)

- Frontend Leadership:** Led the end-to-end frontend development for a specialized agent platform covering search, booking, and account management using accessible Material UI forms.
- Whitelabeling & Margin Engine:** Developed a robust whitelabeling utility empowering travel agents to generate branded tickets and customized invoices. Implemented dynamic pricing logic that allows agents to seamlessly add and track custom markups/margins prior to client delivery.

TryVisa (B2C Visa Booking Platform)

- End-to-End Development:** Architected and developed a consumer-facing (B2C) visa application platform, handling both UI/UX implementation and backend integration.
- Conversion Optimization:** Streamlined the complex visa application flow, reducing average checkout time from ~3 minutes to under 1 minute through step reduction, improved state validation, and telemetry-driven iterations.

Operations & Automation (Cross-Platform)

- Workflow Automation:** Built critical ops workflows and alert systems using n8n and Make.com, cutting manual support intervention by ~80%.
- Internal Tooling:** Developed Retool dashboards to monitor system health, user behavior, and bookings, significantly improving incident response times for internal teams.

EDUCATION

MBA, BUSINESS ANALYTICS (ONLINE)
Chandigarh University

(in progress)

B.TECH
SETH JAI PRAKASH MUKAND LAL INSTITUTE OF ENGINEERING & TECHNOLOGY (Radaur)
